

Several Simple Searching Skills

Just remember:

You can quote
Little Lynx 100%,

"With my trunks
on (+) or off (-), I will
win the title."

Plus (on [+])	Minus (off [-])	Truncate (trunks*)	Quotes	Lower Case (little)	Percent Sign %	Links (Lynx)	Title
+ includes (place at beginning of word)	- excludes (place at beginning of word)	*stands for any letter and allows variations of the truncation (place at end of word)	Enclose phrases in quotations	Case matters. Lower case gets all; upper case selects only capitalized words.	% allows any letter.	link:page.com link is singular (do not capitalize link or space after colon.) Truncate URL	title:term (do not capitalize title or space after colon.)
There is no space between the + or - and the word. There is a space between words. Treat phrases in quotes as you would treat a word.		In general, never search for a plural word. The truncated word retrieves all forms.	Find "phrases in quotes"		If unsure of spelling place % in place of unknown letter.	Find pages linked to source	Find words in the title
